

Current and Pending Support (download)

The Current and Pending Support download provides information about which projects a specific research team member is currently working on or planning to work on in the future. The download is an Excel file which contains data from both GMAS and PeopleSoft.

Various sponsors have different requirements for the content and format of the Current and Pending Support document. This download from GMAS is not intended to be submitted directly to sponsors; instead, the compiled data in the download can be used to populate various Current and Pending Support documents.

Access

Each person in GMAS has a link to their Current and Pending Support (download) from their Person Profile. (Person Profiles can be accessed by searching for a person using the "People" link in the top GMAS navigation bar).

From a Person Profile screen in GMAS, clicking the "Current and Pending Support (download)" link will begin downloading an Excel file containing that person's current and pending support information. The download can then be saved to a user's local computer.

All GMAS users have access to download any other person's Current and Pending Support download.

Harvard, John

Portfolio

Research teams

- Current and Pending Support (Download)**

If a person is not a research team member on any active or pending projects (in GMAS) and is not set up to be charged to any sponsored projects (in PeopleSoft) then their Current and Pending Support download will contain no data.

Data

Content

A person's download will contain rows for every active and pending project where they are members of the project's research team in GMAS. The download will also contain rows for every project where the person is set up to be charged to the project in PeopleSoft.

Sorting

Active projects are listed first followed by pending projects. Within these two sections, projects are sorted by end date descending.

Data Updates

Data changed in GMAS will be reflected in the Current and Pending Support download as soon as a new version is downloaded. Data changed in PeopleSoft will take two days to be reflected in the download.

Column	Details
Academic months	effort % * 9
Calendar months	effort % * 12
Direct costs for period	populated only for active segments; total authorized direct costs for current period; if the date the document is downloaded on is outside of any period, then this amount will be \$0
Effort %	percentage of salary set up to be charged to project based upon current PeopleSoft costing distributions; includes cost sharing
End date	anticipated end date
Fund	
Obligated amount for period	populated only for active segments; if the date the document is downloaded on is outside of any period, then this amount will be \$0
Principal Investigator	
Project summary	department administrators can add a project summary from the segment home
Role	will be blank when person is not on the project's research team but is set up to be charged to the project
Sponsor	displays prime sponsor when prime sponsor exists
Sponsor award number	populated only for active segments

Column	Details
Start date	anticipated start date
Status	segment status (active or pending)
Title	
Total direct amount	populated for active and pending segments
Total obligated amount (active) / Total proposed amount (pending)	populated for active and pending segments
